

## Skills Summary

Object Craft are a small, highly skilled and informed team of developers with over 50 years experience in application design, deployment, debugging and maintenance across a range of industries & platforms.

---

## Commitment to Quality

At Object Craft we focus on delivering quality solutions, solutions that work as they should.

The best solutions are those that enable customers to be self-reliant and focus on their core business. Our commitment to quality ensures that all work that we undertake will remain effective, easy to maintain and reliable for years to come.

---

## Highly Experienced

Object Craft prides itself on a breadth and depth of hands-on experience across a wide range of industries including:

- Finance
- Directory Services
- Communications
- Internet Service Providers
- Gaming
- Postal Services

Our experience enables us to work with substantial existing code bases, not just code that we've written. We have proven success in understanding, maintaining and enhancing complex systems. This same depth of experience allows us to evaluate new technologies and apply them appropriately to each situation.

## Customer Focussed

Communication is critical to the success of any project. We have an open and honest approach to every undertaking and realise the importance of passing on our knowledge. We believe that the best solutions come from:

1. understanding the customer's problem,
2. separating the business-specific components from the underlying problem domain, and then
3. building a solution that not only meets the customer's immediate needs but also contains the flexibility to add in unforeseen requirements in the future.

Object Craft are valuable and active members of any team and we are renowned for the strength and quality of our relationships.

Some of our satisfied customers include:

- Sensis (formerly Pacific Access)
- Bank of Brussels
- ING Ltd
- NSW Department of Health
- Australian Clearing Services

---

## Open Source Projects

We have a broad and deep knowledge of open source options and solutions and we have developed numerous functional and useful applications – Google, Macquarie Bank and others use some of our open source technologies. We recognise the importance of open source to allow products to be deployed across a range of systems rather than being tied to a single vendor.

All our software is available for download from our website; [www.object-craft.com.au](http://www.object-craft.com.au) (We also provide support).

## Technical Skills

<b>Platforms</b>	Linux, Solaris, SunOS, AIX, BSD, Ultrix, MacOS X, MS-DOS, Microsoft Windows NT/2000/95/98/ME/XP/3.1, OpenStep, BTOS, CP/M, AmigaDOS, VMS
